The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer requirements.

With a association consisting of over 90 independent sellers, the forklift group provides quality materials handling equipment to the comprehensive North American marketplace. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The lift truck product line remarkably features 63 different versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various vehicle designs vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American marketplace, due to its exceptional level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division located in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

In the beginning the domestic forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a domestic equipment expansion project. Sales of these goods were initially targeted to state-run corporations, large scale corporations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Daewoo began the first home-based forklift business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a situation of substantial growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to respond to competitive pressures in the US materials handling industry. This endeavor greatly expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a new plant which helped establish the business for the fabrication of high end added-value products suitable for export. In 1993, the corporation had a global sales network and started exporting models they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international marketplaces.
