

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

Whilst on their journey, John spent time talking to former business associates whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a considerable market for a product that could quickly and securely elevate individuals in the air to accomplish upkeep and other construction functions.

After returning from their trip, John set up a joint venture with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they produced and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design elements of that original lift into current versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into several international markets and continues to develop new machines to guarantee that clients are able to become safer and more well-organized within their workplace.
