

## Barrel Clamps

Barrel Clamp - A Barrel Clamp is actually a mechanical or hydraulic attachment for a forklift. It can be used so as to compress the object you wish to transfer with the lift truck and is typically utilized for handling paper rolls, barrels, and kegs. Some designs of barrel clamp attachments likewise have a revolving function. For instance, the revolving function allows the individual operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
